

# Top Reasons to Finance

## Improved cash flow

Financing allows for more affordable monthly payments that increase cash flow. Payments can also be scheduled to coincide with a company's seasonal cash flow.

## Avoid risk of usage or technology obsolescence

Your use of equipment may evolve beyond the equipment's capabilities. Financing can protect you by allowing upgrades and equipment add-ons.

## Conserve operating capital

Financing frees up working capital for higher yield investments or other business expenses.

## Fixed payments

Understanding your monthly payments improve a company's ability to budget and forecast. Other bank lines are floating and can rise leaving you paying more than expected. Financing allows confidence in your capital.

## Acquire more equipment

Financing makes equipment more affordable. Your monthly financing payment is a small portion of the total cost of the equipment, allowing a greater amount of equipment to be purchased.

## Choice of equipment

Finance the equipment you need and all the normal manufacturer warranties are passed through to you. Additional United Guard Warranty can also be added as part of the financing package.

## Preserve lines of credit

Financing does not affect bank lines of credit so they are preserved for future business needs.

## Tax advantages

The IRS 179 allows businesses to deduct the full purchase price of equipment from taxable income, including purchases and leases of both new and used equipment.
