

Customer Equipment Solutions: Onsite Programs

Fleet Maintenance Management Program

Keeping your fleet operating at peak efficiency, well-maintained and ready when you need it is no easy task. In fact, most companies we work with struggle without a well-defined strategy to operate and maintain all the equipment on the worksite. Designed for large worksites, the United Rentals' Fleet Maintenance Management Program will help you maintain – and manage – your owned equipment and site vehicles using the same systems, processes and expertise we apply every day to our more than 14+ billion dollars in fleet.

Fleet Advisory Services

Best-in-class Systems for Best-in-class Performance

United Rentals systems and technology work together to help you see, measure, manage and optimize your equipment usage. **Telematics** tagged equipment (whether rented or owned) brings full visibility to your fleet. United Rentals can even tag your equipment for you. All of the information and insight is easily accessed through **Total Control**[®], a cloud based worksite management solution that helps you make the most of your equipment fleet. With **Telematics** and **Total Control**[®], you can track location, utilization and access. Most importantly, you will have insights to help you benchmark and optimize your spend on equipment.

MAINTENANCE SERVICES

We'll station a dedicated team of factory-trained, certified mechanics right on your site. Work typically includes:

- Planned repairs/preventative maintenance
- Standard unplanned repairs
- Monthly/annual inspections – ANSI, OSHA, CSA
- Warranty work
- Specialty repairs
- Tire repair
- Bodywork/glass
- State vehicle inspections

PARTS AND MATERIAL MANAGEMENT

We will design a parts and material program to meet the immediate needs of critical and non-essential assets while balancing the requirements (and expense!) of stocked parts to that of just-in-time delivery. We have the brands you rely on for every kind of fix.

- All parts procurement managed through United Rentals fleet management systems
- Leverage United Rentals' buying power with OEM dealers and alliance vendors.
- Develop JIT delivery methods
- Determine requirements for stock parts – critical assets
- Evaluate current parts inventory – identify active and obsolete parts

FLEET SYSTEMS

We will provide a single point of contact to oversee your fleet operations using the state-of-the-art systems and tools we use to manage ours.

- Single point of contact
- United Rentals' fleet management systems, including Total Control[®], the industry's leading platform for viewing and managing rented and owned equipment.
- Defined service schedules
- Work order processing
- Proactive service alerts
- Comprehensive performance reporting
- Fueling solutions

FLEET ADVISORY SERVICES

We combine data and expertise to help you get better insights to get better performance.

Fleet advisory services typically include:

- Equipment lifecycle planning
- Fleet right-sizing
- When to own or rent
- Vehicle fleet optimization
- Development of site-specific fleet strategy
