

# ENVIRONMENTAL MONITORING

Utilizing wireless technology to establish a mesh network on your work site, our WEDGE™ platform allows you to keep your projects and people safe with active oversight on changing environmental conditions.

- Remotely monitor various conditions including temperature and humidity
- Set thresholds
- Control HVAC equipment wirelessly
- 24/7 SMS & email alerting
- Fuel and labor savings
- Robust reporting features for insurance and liability purposes
- Scalable and fully customizable

The WEDGE™ sensor network does the heavy lifting for you, in all weather conditions, year-round. Mitigate risks and increase savings with proactive site management.
